DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 and 5-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Slat et al. (US 2003/0091769).

Slat discloses a molded plastic container or preform having a wall with at least one matrix resin layer and at least one intermediate resin layer, said intermediate resin being blended with an additive, said wall have at least one localized portion of predetermined geometry that is thicker than surrounding portions of said wall and within which said additive is discernable (36 from Fig. 3), said container or preform including a closed end, a sidewall extending from said closed end, a finish portion terminating said sidewall, an enlarged portion formed in at least one of said closed end, said sidewall, and said finish portion, wherein a barrier layer including an additive therein in at least one of visible light and ultraviolet light (paragraphs [0044] – [0047]), wherein said additive is more visibly pronounced in said enlarged portion (since the additive is in the barrier layers and the thickness of the barrier layers can vary at any given point, paragraph [0026]) (applies to instant claims 1-2 and 5-9).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slat et al. (US 2003/0091769) in view of Brady (WO 98/04464).

Slat fails to disclose wherein an embossed portion comprises a logo which is in a sidewall.

Brady discloses wherein an embossed portion comprises a logo which is in a sidewall (abstract and Fig. 1) in a container for the purpose of providing a more striking appearance and to convey information (applies to instant claims 3-4 and 10).

Therefore it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to have provided wherein an embossed portion comprises a logo which is in a sidewall in the container or preform of Slat in order to provide a more striking appearance and to convey information as taught or suggested by Brady.
